

ALISON GALINDO

AI & Technology Lead | Full-Stack Software Engineer

Recife, Brazil | alison.galindo@proton.me | linkedin.com/in/alissonrgalindo | alison.expert

PROFILE

AI & Technology Lead and Full-Stack Software Engineer with 14+ years of experience building digital products and developer platforms. I design and implement AI agent and multi-agent workflows that support engineering and business processes, developer productivity, and practical AI adoption. My foundation spans full-stack delivery, design systems, accessibility, and technical leadership.

CORE EXPERTISE

AI systems: agent workflows, multi-agent orchestration, tool integration, human oversight, automation, evaluation and validation.

Engineering: Python, Node.js, TypeScript, JavaScript, React, Next.js, APIs, web and native products, CI/CD, Playwright.

Product foundations: design systems, UI libraries, Storybook, accessibility, component architecture, technical mentoring.

PROFESSIONAL EXPERIENCE

Future Works | AI & Technology Lead

May 2026 - Present | Remote

- Lead practical AI adoption across engineering and business teams.
- Design and implement multi-agent workflows coordinating around 20 specialized AI agents for software development, research, automation, review, testing, and delivery.
- Establish reusable engineering patterns for integrating agents into existing workflows, with clear boundaries and human oversight.
- Remain hands-on across full-stack, web, native, Python, React, testing, and CI/CD.

Future Works | Software Developer

Mar 2026 - May 2026 | Remote

- Delivered full-stack features across web and native applications using React, Next.js, TypeScript, Python, Node.js, and APIs.
- Built reusable components, end-to-end tests with Playwright, and CI/CD improvements.

ArcTouch | Frontend Developer

Jun 2025 - Feb 2026 | Remote

- Built frontend features for internal products and shared responsibility for a design system and UI library.
- Defined component standards for architecture, APIs, documentation, contribution, accessibility, and code quality.

RedCloud | Frontend Developer

Jul 2023 - Jul 2025 | Remote

- Built a UI library and onboarding experiences, including integrations with Ory and VTEX.
- Developed custom flows and mobile integrations, and aligned frontend work with design, backend, and leadership.

AKQA Group | Frontend Developer

Jun 2022 - Mar 2023 | Remote

- Built and maintained a design system for Jägermeister's ecommerce platform.
- Developed animated UI components and Contentful, Shopify, and GraphQL integrations.

NMQ Digital | Front-End Developer

Jan 2021 - Jun 2022 | Remote

- Led UI development for Shimano's global website and built a reusable UI library for marketing initiatives.

CESAR | Front-End Developer

Nov 2018 - Dec 2020 | Recife, Brazil

- Developed a design system and UI library supporting components across more than 20 projects.
- Mentored junior developers and shared knowledge about CSS and UI engineering.

EARLIER EXPERIENCE

Flow Up (2016-2018), Mekatronik (2016-2017), WI Informatica (2014-2015), Agencia PBK (2013-2014), and SM Marketing & Design / Kenners (2012-2013): UX/UI design and frontend development for digital products.

EDUCATION AND LANGUAGES

FAFICA: Systems Analysis and Development, 2009-2012. **Unibratéc:** Postgraduate study in Web App Design with Front-End Technology, 2013-2015.

Portuguese: native. **English:** full professional proficiency (C1).
